

Deviation vs performance, n = 110 races / 71 swimmers

validation_plan §8: $I = (PB - T)/PB$ against $D = RMSE$ from the fitted M3 shape, quadratic fit (MixedLM random intercept per swimmer (REML)). $b1 = 0.383$ [-4.089, 4.856], $b2 = 14.719$ [6.269, 23.169] (% per pp, % per pp^2).
